

Evaluation of resources for analyzing drug interactions

Risha I. Patel, PharmD Candidate; Robert D. Beckett, PharmD, BCPS

APPENDIX

Final sample of interactions

Allopurinol and azathioprine	Erythromycin and cyclosporine
Amiodarone and atorvastatin	Erythromycin and digoxin
Amiodarone and cyclosporine	Erythromycin and diltiazem
Amiodarone and digoxin	Erythromycin and simvastatin
Amiodarone and simvastatin	Erythromycin and verapamil
Amiodarone and warfarin	Fluconazole and atorvastatin
Amlodipine and diltiazem	Fluconazole and combined oral contraceptives
Amlodipine and verapamil	Fluconazole and cyclosporine
Anorexiant and MAO inhibitors	Fluconazole and simvastatin
Anticoagulants and androgens	Fluconazole and warfarin
Anticoagulants and barbiturates	Fluoxetine and tramadol
Anticoagulants and fish oil	Fluoxetine and tricyclic antidepressants
Anticoagulants and flaxseed oil	Ganciclovir and zidovudine
Anticoagulants and garlic	HMG Co-A reductase inhibitors and gemfibrozil
Anticoagulants and ginger	Itraconazole and atorvastatin
Anticoagulants and ginkgo	Itraconazole and simvastatin
Anticoagulants and ginseng	Levodopa and MAO inhibitors
Anticoagulants and salicylates	Lithium and furosemide
Anticoagulants and thyroid hormones	Lithium and lisinopril
Carbamazepine and cyclosporine	Lithium and naproxen
Carbamazepine and diltiazem	Meperidine and MAO inhibitors
Carbamazepine and macrolide antibiotics	Methotrexate and NSAIDs
Carbamazepine and tramadol	Methotrexate and probenecid
Carbamazepine and verapamil	Methotrexate and salicylates
Clarithromycin and combined oral contraceptives	Methotrexate and sulfonamides
Clarithromycin and cyclosporine	Methotrexate and trimethoprim
Clarithromycin and digoxin	Nitrates and sildenafil
Clarithromycin and diltiazem	Paroxetine and tramadol
Clarithromycin and simvastatin	Paroxetine and tricyclic antidepressants
Clarithromycin and verapamil	Phenytoin and combined oral contraceptives
Diltiazem and amlodipine	Phenytoin and cyclosporine
Diltiazem and cyclosporine	Phenytoin and diltiazem
Diltiazem and verapamil	Phenytoin and fluoxetine
Echinacea and immunosuppressants	Phenytoin and simvastatin
Ergot alkaloids and macrolide antibiotics	
Erythromycin and atorvastatin	

Phenytoin and verapamil
Phenytoin and warfarin
Pimozide and azole antifungal agents
Pimozide and macrolide antibiotics
Potassium and potassium-sparing diuretics
Quinidine and amiodarone
Red yeast rice and statins
Rifampin and combined oral contraceptives
Rifampin and cyclosporine
Rifampin and digoxin
Rifampin and diltiazem
Rifampin and verapamil
Rifampin and warfarin
SSRIs and MAO inhibitors
St. John's wort and amitriptyline
St. John's wort and combined oral
contraceptives
St. John's wort and cyclosporine
St. John's wort and digoxin
St. John's wort and diltiazem
St. John's wort and indinavir
St. John's wort and MAO inhibitors
St. John's wort and verapamil
St. John's wort and warfarin
Theophylline and macrolide antibiotics
Thiopurines and allopurinol
Tricyclic antidepressants and MAO
inhibitors
Verapamil and amlodipine
Verapamil and cyclosporine
Warfarin and NSAIDs
